MISCELLANEOUS.

NOTHING LIKE IT
Its peculiar efficacy is due as much to the process and skill in compounding as to the ingredients themselves. Take it in time. It checks diseases in the outset, or if they be advanced will prove a potent cure.
No Home should be Without It.
It takes the place of a doctor and costly prescriptions. All who lead sedentary lives will find it the best preventive of and cure for Indigestion, Constipation, Headache, Biliousness, Piles and Mental Depression. No loss of time, no interference with business while taking. For children it is most innocent and harmless. No danger from exposure after taking. Cures Colic, Diarrhœa, Bowel Complaints, Feverishness and Feverish Colds. Invalids and delicate persons will find it the mildest Aperient and Tonic they can use. A little taken at night insures refreshing sleep and a natural evacuation of the bowels. A little taken in the morning sharpens the appetite, cleanses the stomach and sweetens the breath.
FOR WHOSE BENEFIT
A PHYSICIAN'S OPINION.
"I have been practicing medicine for twenty years and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system."

PIANOS.
GAINED FIRST PREMIUM FOR GREATEST merit at the New Orleans Cotton Centennial and WORLD'S Exposition for refined and wonderful power of tone, elegance of design, and superb finish. Only piano endorsed by United States commissioners, from each of the States. Cases finest carved, rosewood finish—finest imported double repeating action—three strings throughout of best patent steel wire—keys best ivory. Our new patent steel tuning device, instead of wood, is the greatest invention ever made in pianos. It consists of stationary STEEL tuning pins that are set in a mold and molten STEEL is run round the pins keeping them solidly in place. A thimble or shell pin is made to exactly fit the stationary pin revolving therein; thus the strings wind round the pins. After the strings are properly stretched the piano can never get out of tune, the rest plank being of STEEL not affected by extremes of climate. This will be appreciated by all musicians in city or country. It will stand twenty years without tuning and is good for 100. No other piano has this improvement.
Great strength and durability is another advantage. In other pianos holes are bored in wooden boards and tuning pins inserted. The pins turn round in this board and cannot stand permanently in tune, and it often cracks, splits, dry s out, becoming utterly, totally and entirely worthless as a musical instrument. Our STEEL tuning device is in no way affected by such casualities, and the sounding board is so constructed that our pianos can never become thin or metallic in tone. They are always in tune and the expense of tunning is saved. This patent alone is worth millions and makes our piano the greatest in the world. Prices are no higher than other pianos. Buying direct from us, the largest manufacturers, you save $100 or $200—dealers' profits. Don't mind the ominous growlings of dealers and agents, who see their chances of selling a poor piano at a big profit of $200—slipping away—pity them.
We guarantee our pianos ten years. 200 styles. We have put our prices at lowest bed-rock for Cash.
A $600 Piano for $259.50; a $900 Piano for $297.50; a $1200 Piano for $375.50; a $1500 Piano for $475.50.
Upright Cabinet Grands, with stool and rubber cover shipped on board cars at S. F., to any part of the United States, Canada or Mexico. Our terms are cash with order. If not as represented money returned. We occasionally have good second-hand pianos, made over at $100 to $300, which we take in part payment for our own. Write recall for catalogue, free.

Self Winding Clocks.

A chain of synchronized self winding clocks is being established here through the efforts of Henry Denver, manager of the Western Union Telegraph company. The time pieces do not obtain their motive power from electrical action, thus being subject to hindrances resulting from entire dependence on electrical currents, but instead gains the necessary force from the action of a fine spring, as does an ordinary clock. Two small cells of battery are placed in the top of the case, connected with a magnet secured to the lower part of the movement. As the center wheel, driven by the unwinding of the spring, advances, a lever is raised that unlocks the armature and allows it to spring back into position ready for winding. When the lever drops the circuit is instantly closed, the spring being wound by the pawl fastened to the armature.

The action of winding breaks the circuit when the winding is completed. The contacts are made so short that the action of the battery is very slight, thus enabling it to perform the work of winding for over a year without renewal or alteration. Each clock is provided with a simple attachment by means of which its hands may be controlled automatically by electricity. To secure absolute uniformity of time throughout the city the clocks will be connected with a time wire just before 12 o'clock each day. During the brief period of connection the standard clock at Washington through the repeating lines takes possession of the wire, temporarily controlling all clocks in its circuit.—Springfield Republican.

The Wilderness Cure for Impaired Sight.

Edward Sturtevant, son of D. W. Sturtevent, of Albany, has been sojourning in the wilderness all summer near Old Valley Dodge, northerly of Boonville. He lives in a shanty alone, save for occasional visitors who share his hospitality.

Mr. Startevant entered the woods last June, at the advice of his physicians, to seek restoration of impaired vision. The experiment has proved so advantageous and beneficial that Mr. Sturtevant proposes to remain there during the coming winter. He has sent home for his winter clothing to be forwarded to him.

Mr. Sturtevant is a machinist, and was employed in the Edison electric light machine works at Schenectady. In his sylvan retreat he whiles away the time in reading, fishing and hunting, and seems entirely content with his surroundings. The former vigor of his optic nerves is rapidly returning, and he has concluded to remain in the woods until a perfect cure is attained.—Amsterdam (N. Y.) Sentinel.

A Kitten's Journey.

Miss Amelia McLogan resides on Fourth street. A couple of weeks ago an old cat which made its temporary headquarters in the house in which Miss McLogan lives, was found to be the mother of a dozen or so kittens one morning, and four days after the arrival of the brood Miss McLogan left for New York to make some purchases for the firm she represents. When she had gone the old cat discovered one of her kittens missing, and had been in a great stew about it ever since. The young feline was industriously searched for, but no trace of its whereabouts could be found until a letter was received from Miss McLogan saying that on unpacking her trunks she found the little one curled up and in good physical condition. She gave the kitten to a chambermaid, as she did not care to bring it back. It seems strange that a kitten less than a week old could live in such a place.—Detroit Tribune.

Folding Napkins by Pattern.

Commercial enterprise has entered a fresh field in the recent issue by a New York firm of paper patterns for folding table napkins. This art has up to this time been relegated to the butler's and parlormaid's repertoires, and competency or the reverse in its accomplishment has frequently been one of the tests of eligibility to service. Now, however, this is done away with, and the mistress of an establishment may have the knack at her finger ends to teach the merest novice in her employ. It is a question, however, if this universal knowledge will not deprive fashionable tables of one element of individuality now imparted by the exclusive napkin lore of some treasure of a "Jeems" or Martha.—New York Times.

Bogus Stamps.

A Hamburg firm is making a fortune by selling bogus Heligoland postage stamps to collectors in Germany. As soon as the Anglo-German agreement concerning the island became known there was a tremendous demand for the old Heligoland stamps, and the prices went up to forty-five and fifty cents apiece. The firm in question at once bought the Heligoland stamp for little more than its value as old metal, and has kept it a-going day and night ever since. It has sold already 20,000, and has more orders in sight than it can fill. At a recent meeting of the postage stamp bourse in Berlin a movement to stop the fraud was started.—Exchange.

A Religious Census.

Something new in the census line is under way in the village of Waterford. It is called a "religious census," and is being taken under the direction of a committee representing the four Protestant churches of the village. The members of the committee or their assistants call at each house and ascertain how many there are in the family of a church going age; what church they attend, if any, or to what denomination they have a predisposition. When persons are found who do not attend any church they are also noted down.—Albany Express.

A Mother's Eulogy.

Judge Howell C. Glenn, of Atlanta, is dead. His old mother pronounced this eulogy upon him: "In all his life he never gave me an impatient word, and that is why I love him so dearly."—Richmond State.

Popped the Question by Cable.

An incident of an interesting and somewhat romantic nature has arisen out of the visit of the British farmer delegates to Canada. Mr. H. Simmons, of Wokingham, England, found at Moosomin, N. W. T., a bachelor friend of his who has been settled in the territories for some years and has done well. Mr. Simmons was so delighted with the surroundings of Moosomin that he purchased the section adjoining his friend's farm.

A daughter of Mr. Simmons is engaged to be married to a young Surrey farmer, the happy event being fixed to take place immediately upon Mr. Simmons' return to England. It was the intention of the young couple to proceed to Australia to settle, but Mr. Simmons cabled them of his land purchase, and intimated that he desired his son-in-law and daughter to locate upon the property at Moosomin. The reply was promptly flashed back that they would do so.

It appears, however, that Mr. Simmons has another unmarried daughter, and the Moosomin man suggested that, to make the little family arrangement complete, this lady should become his wife and the two families would be living side by side. Mr. Simmons confessed that the arrangement would suit him, but he could not speak for the young lady. However, he was urged to send a second message over the cable conveying the offer of marriage, and a prompt "Yes" came back.—Cor. Toronto Empire.

How to Get Rid of Icebergs.

One of the greatest dangers to Atlantic navigation, and therefore of great practical interest to seamen, passengers and owners of ships, is the possibility of collisions with icebergs. This year these huge products of Artic winters have been unusually common, and it is stated that more than twenty have been sighted in the course of twenty-four hours in the track of steamers plying from New York to Liverpool or the Clyde.

A correspondent in The London Times makes a suggestion that these icebergs might be used as targets by cruisers, and thus broken up and dispersed. The suggestion is well received in England, and it is urged that the British meteorological department follow the example of that of the United States, and mark on charts the area within which icebergs are to be expected. The captain of a cruiser setting out with such charts in his possession would have a comparatively easy task in finding where the target floated at which he was to fire.

An English Duke.

William John Arthur Charles James Cavendish-Bentinck, sixth duke of Portland, who with his wife is about to visit America, is described as an extremely democratic and level headed young man of 32. His simplicity and bonhomie are attributed to the fact that he was born a commoner, and until he was 22 years of age remained the inconspicuous Lieut. Cavendish-Bentinck, succeeding to the title on the death of his cousin, the fifth duke. Only two other English dukes were not born to the strawberry leaves—the duke of Bedford, who was plain Mr. Russell, and the duke of Devonshire, who was Mr. Cavendish. The beautiful duchess of Portland was Miss Winifred Dallas-Yorke, only daughter of Mr. Thomas Yorke Dallas-Yorke, of Walmsgate, Lincolnshire, who is said to trace his pedigree in an unbroken descent from Adam, and to look down on the whole British peerage as parvenu.—Harper's Bazar.

Rich from an Accident.

A remarkable instance of the fickleness of fortune which occurred in Butte, Mont., several weeks ago, has just come to light. Dave Evans, a young miner, had been to see his best girl Sunday night. Returning home late he fell into an abandoned prospect hole, and was compelled to remain until the following morning, when, in ascending by means of a rope, he scaled off a portion of the wall and discovered a rich lead of silver. He leased the mine, and is now taking out ore that yields $300 a ton in silver and a considerable quantity of copper. He has been offered $50,000 to cancel his lease, but refuses to sell. He will become a millionaire, while the fellows who leased to him have already become hopeless lunatics.—Cor. Chicago Times.

A Sugar Candy Jubilee.

Gondal is a Lilliputian Hindoo state, in the Bombay presidency. Its area is about eight times that of London; it has 140,000 inhabitants, and rejoices in an army of 600 sepoys, with sixteen cannon and a squad or two of cavalry. The ranee, or queen, of this state may, possibly enough, have asked whether the maharanee, or great queen, of England distributed sugar candy among the population of the British Isles on the occasion of her jubilee. It is what the Hindoo queen would have done. She dispensed sugar candy among her subjects of Gondal the other day in gratitude for her recovery from sickness.—London Standard.

Pass Charmed by a Snake.

A monster rattlesnake was killed Monday at "Wormsloe" plantation, nine miles from this city. It was discovered near the house of a colored woman named Lizzie Jones, and it had her house cat charmed. The cat seemed to be unable to move, and the snake was just about to strike when Lizzie threw a billet of wood, which caused the cat to spring into the air as though it was released from an enthrallment. The snake was shot by one of the neighbors. It measured seven feet, and had twenty-two rattles and a button.—Savannah News.

The Fulminate Cap.

A railroad laborer named Johnson at McLean & Janse's camp, about three miles east of Mullan, Idaho, attempted to commit suicide by means of a cap used in setting off giant powder and exploding it. He placed the cap between his teeth and struck it with a small hammer. The attempt was not an entire success. It had the effect, however, of completely shattering the inside of the man's mouth.—Rocky Mountain News.

Ensign Jackson's Good Fortune.

Congress has done a very creditable act in authorizing the president to appoint Richard H. Jackson, of Alabama, an ensign in the navy. Young Jackson, having finished his studies in the naval school, was sent on a two years' cruise, at the end of which a part of the class, under the law, was retired and the others made ensigns. Jackson fell among those retired. But when he was on his cruise he distinguished himself so greatly that this special law has been passed to retain him in the navy.

It was at the great storm at Apia, Samoa. At a critical moment, when the Trenton was about to drift on a reef, he led the men aloft, where their bodies had the effect of a sail, and this saved the ship. Admiral Kimberly highly complimented Mr. Jackson on his bravery in time of such peril, and in a report to Secretary Tracy says that he not only saved the Trenton's crew, but also that of the Vandalia, who would all have been lost had not the Trenton drifted alongside and rescued her men.

Mr. Jackson is only 23 years old, and was appointed to the Naval academy by Gen. Wheeler, of Alabama, graduating in 1887.—Raleigh News and Observer.

Contesting a Live Man's Will.

In the probate court at Cincinnati the case of Mrs. Josephine Fee against J. J. Hopple was heard by Judge Goebel. It is a case in which the daughter sues her father to prevent the carrying out of his will, instead of waiting until after his death to contest it, on the ground that he has, by undue influence, disinherited her not only, but been led to aver that she was not his daughter, by reason of some alleged flaw in his marriage to her mother, his first wife.

That good woman died years ago, and it is about twenty years since Mr. Hopple married a Miss Boone, who had been his nurse through an illness. Mrs. Boone-Hopple did not like her stepdaughter Josephine, and it is alleged that she induced Hopple to destroy a will in which he had provided for Josephine as his "beloved daughter," and to make the new will, leaving the latter practically without share in his $50,000 estate. It is a case interesting and unique.—Cor. Philadelphia Record.

Hearst's Rich Gold Mine.

"The Homestake mine, in the Black Hills, of which Senator Hearst is a principal owner, is the richest gold mine in the world," said H. C. Rorapaugh, of Deadwood, S. D., at the Metropolitan. "It is the biggest in a group of mines in the immediate vicinity of Deadwood. The company has 3,000 men at work in the mines, mills and woods. For fourteen years they have never missed a dividend, and every month take out from $150,000 to $300,000 in gold. There are 1,200 stamps in operation. The vein of the Homestake is 300 feet wide by about two miles in length, and there is ore enough in sight to run all the mills for the next twenty years."—Washington Post.

Hard to Swallow.

A death from a remarkable cause is reported from Coosa county, Ala. Thomas Waits, a young man of 23, living about seven miles from Verbena, contracted in his youth the habit of eating dirt and red gravel rock. As he grew to manhood the abnormal appetite grew upon him. For some months previous to his death he worked on a gravel train on the South and North railroad. He could not procure such rocks as he had been in the habit of eating, and finally would eat hard flint gravel or any other kind convenient. As he could not masticate his strange food he eventually took sick and returned home to die.—New Orleans Times-Democrat.

Red Cotton.

For two years or more considerable publicity has been given to and no little interest excited by the discovery of red cotton and the efforts to perpetuate its growth. According to the latest report the several attempts have been successful in the main. A planter in Alpharetta, Ga., has an acre of cotton, every stalk of which is said to be of a deep red color, leaf, ball and bloom. This novel crop is the product of seed derived three years ago from two stalks of red cotton found in a cotton field. If this variety can be perpetuated it will likely mean a fortune to the successful planter.—Baltimore Manufacturers' Record.

Near Gladstone, Mich., a few nights ago, a locomotive on the Soo line killed three deer. The engine was running thirty-five miles an hour, when a buck and two does stood in the center of the track "fascinated by the flash of the headlight." The engineer could not stop his train in time to avoid the collision, which resulted in injury only to "the poor dappled fools."

A jury at Syracuse, N. Y., a few days ago found a verdict for the defendant, but the foreman blunderingly announced a verdict for the plaintiff, and the court recorded the same and gave judgment accordingly. When the mistake was discovered after the jury's discharge the judge said he could not change the record. The case furnishes a riddle for the lawyers.

While swimming in the Marine dock, St. Louis, a few days ago Richard Jackson felt a sharp, stinging pain in the leg, and thought he was bitten by a snake. Dressing himself he was on his way home when he fell screaming in agony. Investigation disclosed that the "snake bite" was a two inch sliver of wood.

Herman Zietung, now in London, expresses a desire to be nailed up in a box and shipped to New York. He has traveled considerably in that way and likes it. He once made the journey between Vienna and Paris in a trunk, and has just completed the trip between Berlin and London, also in a trunk.

Street Commissioner Wolverton, of Adrian, Mich., had a calf which had the habit of sticking its head out of the barn door. Recently a bolt of lightning killed it. The queer part of the case is that the barn entirely escaped.

THAT HALL OF RECORDS AGAIN

As predicted in these columns last week the Supervisors have again added to the cost of the Hall of Records in course of construction at Santa Rosa. On Tuesday last, on motion of Supervisor Smith, the contractor was authorized to make still further changes and alterations in the original plans and specifications for which he is to receive an additional $1671. This, with the sum of $1,654 allowed the contractor last week for similar changes, places $2325 more of the tax-payers money in the pockets of that individual. The Supervisors who are so liberal with other people's money and voted for the additional outlay ought not to be forgotten by the people of this county. They are Messrs. Cady, Smith, Clark and Davis.

ADVICE TO HUSBANDS.

What of the question "Shall our women be allowed pin-money?" The subject "Is marriage a failure!" has been discussed largely and the great minds of the nation are exercised to know whether man's lawful partner, the one he endowed with all his wordly goods, shall be allowanced to a certain sum monthly or yearly, or whether she shall tremblingly ask for just enough money to "buy a pair of shoes" or the children some winter flannels. I have always supposed that when a man and woman joined hands for the walk along life's thoroughfare, they entered into a partnership, or an agreement, as binding as any contract in the ordinary business world. "I the women, bring to this partnership my health, my strength, the culture and education acquired; a stock of love and hope and trust in the future; possible some money. You bring the same. I spend my days in bearing and rearing your children, in taking care of the home, in little ways of economy that saves time and money. You go out in the world and for your toil, to which your more rugged strength is suited, you show certain receipts. Who shall say, that when the expenses of this co-operative mode of living are paid, the sum over and above these shall not be divided. Half is mine and half is thine. An allowance for your partner! Pin money to the one who contributed and continues to contribute as much to this joint stock company as you did! I think when the world awakens to the full sense of this partnership business we shall have better husbands and wives, more daughters trained into the right idea of the responsibilities of wifehood, fewer divorces and more women content to care for their households instead of seeking some employment that will fill their purses and take from them the dependent feeling. The problem of women suffrage will solve itself, for man will then look upon the woman at his side as one equal with himself in matters of business as well as social relations. True love that casteth out fear, that demands and receives justice, will hallow the marriage relation and husband and wife the more cheerfully and willingly toil to contribute towards the joint establishment.—RUTH RAMBLER in Contra Costa *Gazette*.

The World Enriched.

The facilities of the present day for the production of everything that will conduce to the material welfare and comfort of mankind are almost unlimited and when Syrup of Figs was first produced the world was enriched with the only perfect laxative known, as it is the only remedy which is truly pleasing and refreshing to the taste and prompt and effectual to clense the system gently in the Spring time or, in fact, at any time and the better it is known the more popular it becomes.

$1,000 Thrown Away.

In 1863 a Cancer developed on my lower lip. I went under treatment at once, and from time to time since that have had medical aid in New Orleans, Boston and New York, with no benefit at all. It has progressed right along, and now involves my jaw and cheek. One thousand dollars would not cover the loss sustained through the medical and surgical aid I have received. I have certainly tried everything and was benefited by nothing until I took S. S. S. It has done me more good than all else put together, and I believe I will soon be sound and well. Swift's Specific is certainly a great boon to humanity.

Disgusted With a Doctor.

I contracted a severe case of Blood Poison in 1883, and my physicians put me under a mercurial treatment of three months without doing me any good. In fact I was gradually growing worse. I then consulted another physician, who tried me with potash and sarsaparilla, but with no better result. I then became disgusted with doctors and their remedies, and commenced taking Swift's Specific (S. S. S.) After taking seven bottles I was entirely cured, and I have not had any symptoms of a return since. I have recommended S. S. S. to others, who have used it with the same good results.

CONGRESSMAN Geary presented his first bill to the House Saturday, says a Washington dispatch. It provides for the naturalization of aliens. It is a measure that will be especially pleasing to the American party, placing the attainment of citizenship on a higher plane and making the act of taking the oath of allegiance to the Constitution quite a solemn affair. The educational test is applied, and a knowledge of the country and its affairs and history is necessary. A series of questions is provided, and the applicant for citizenship must be able to pass an examination of 60 per cent or naturalization will be denied.

Something for the New Year.

The world renowned success of Hostetter's Stomach Bitters, and their continued popularity for over a third of a century as a stomactic, is scarcely more wonderful than the welcome that greets the annual appearance of Hostetter's Almanac. This valuable medical treatise is published by The Hostetter Company, Pittsburgh, Pa. under their own immediate supervision, employing 60 hands in that department. They are running about 11 months in the year on this work, and the issue of same for 1891 will be more than ten millions, printed in the English, German, French, Welsh, Norwegian, Swedish, Holland, Bohemian and Spanish languages. Refer to a copy of it for valuable and interesting reading concerning health, and numerous testimonials as to the efficacy of Hostetter's Stomach Bitters, amusement, varied information, astronomical calculations and chronological items, &c., which can be depended on for correctness. The almanac for 1891 can be obtained free of cost, from druggists and general country dealers in all parts of the country.

SCROFULA

Is that impurity of the blood which produces unsightly lumps or swellings in the neck; which causes running sores on the arms, legs, or feet; which develops ulcers in the eyes, ears, or nose, often causing blindness or deafness; which is the origin of pimples, cancerous growths, or "humors;" which, fastening upon the lungs, causes consumption and death. It is the most ancient of all diseases, and very few persons are entirely free from it.

How Can It Be CURED

By taking Hood's Sarsaparilla, which, by the remarkable cures it has accomplished, has proven itself to be a potent and peculiar medicine for this disease. If you suffer from scrofula, try Hood's Sarsaparilla.

"Every spring my wife and children have been troubled with scrofula, my little boy, three years old, being a terrible sufferer. Last spring he was one mass of sores from head to feet. We all took Hood's Sarsaparilla, and all have been cured of the scrofula. My little boy is entirely free from sores, and all four of my children look bright and healthy." W. B. The weather the fore part of the week was extremely cold. Everybody was shivering, and overcoats, hot toddies, extra blankets and red hot stoves were in demand. There was a decided change, however, on Thursday, since which time the days have been warm and pleasant.

The Grand Officers of the U. A. O. D. paid a fraternal visit to Sonoma Grove, No. 75, last Saturday evening. The visiting brethren were banqueted at the Toscano Hotel by the members of Sonoma Grove, who spared neither pains nor expense to make the visit of their brethren an enjoyable one.

Willie Weyl, the ten-year-old son of City Trustee Weyl, accidentally shot himself in the hand last Saturday. He was handling a parlor rifle and it was prematurely discharged, the ball piereing one finger and imbedded itself near the joint of another finger. Dr. Vance extracted the bullet and the wound is healing favorably.

The people of this place regret the departure of the Pawnee Medicine Company which left town last Tuesday morning for the city of Napa. While here the company pleased every one, not only with their gentlemanly deportment, but by the splendid free entertainments given nightly. We hope to see this excellent company back in Sonoma at no distant day.

THE PLESS DREDGER.

Great Invention—It Will Revolutionize Reclaiming Operations in this State.

Success of Its Workings in the Marshes of Sonoma Creek.

In California, bordering on the shores of San Francisco and San Pablo bays and along the Sacramento and San Joaquin rivers, are vast areas of rich alluvial lands subject to overflow. These lands, which are generally known as swamp and overflowed lands, have been proved to be the richest in the State for agricultural purposes. Here and there small areas have been reclaimed at great expense and when put under a state of cultivation have produced immense crops of wheat, barley, corn, oats and almost everything else that grows. Ever since the fertility of these overflowed lands became known a great deal of time has been spent and money expended in endeavoring to reclaim them for agricultural and grazing purposes. These efforts for the most part have proved failures owing to the great expense attached to the undertaking and the slow and tedious workings of the various dredgers employed to do the work of leveeing, excavating, etc.

Some years ago the attention of W. B. Pless, formerly of Stockton, but now a resident of Sonoma, a civil engineer of great inventive genius, was attracted to the various fruitless attempts to reclaim our swamp lands. He saw that if these lands could be made susceptible of cultivation with small cost that a fortune awaited the owners and tillers of the soil and also the man who could devise the means of reclaiming these lands in a rapid, substantial and economical manner. He therefore set about the task of overcoming all the obstacles that had made most of the reclamation schemes of California a failure. After years of hard mental toil his efforts were crowned with success, and he brought forth a model for a dredger that is bound to revolutionize the reclamation of the overflowed lands of California.

Having patented his invention, Mr. Pless immediately proceeded to put the same into practical shape, and at a cost of $20,000 had a compound bucket dredger constructed at the Globe Iron Works, which he named the Nevada, in honor of Senator Jones, whom he had succeeded in interesting in his enterprise. This dredger is a marvel in its workings, and one of the largest and most perfect ever constructed, and shows the master mind of the inventor.

The dredger is 80 feet long, 34 feet wide and has a depth of hold of 6½ feet and has an upper and lower deck. The latter is used to operate the ponderous machinery, while the former is fitted up with state rooms, dining room, pantry and all the modern appliances of a bay steamer. The boom is 92 feet long and the iron bucket which swings at its end weighs 5000 pounds.

Last spring this dredger, having been completed, was launched at Stockton and immediately proceeded to Sonoma creek, about four miles south of this place. About the middle of June, Mr. Pless having everything in readiness, commenced the work of leveeing the banks of the creek, and reclaiming the adjacent overflowed lands, with most wonderful results. Nothing in the history of dredging machines has ever approached Mr. Pless' invention, and now after a seven months' trial it is pronounced by experts who have witnessed its workings to be one of the most perfect dredgers ever constructed, and one too that has made possible the reclamation of every acre of the swamp and overflowed lands of California.

Of the work Mr. Pless intends to accomplish and what he has already done in the Sonoma marshes we will speak more fully in our next issue.

Rain.

A gentle rain set in last Thursday afternoon and continued to fall at intervals throughout the night, since which time the weather has been warm and pleasant. Grass has commenced to sprout all over the valley and if present weather continues for a week or two there will be an abundance of green feed for stock. Farmers as well as dairymen are jubilant, as Thursday's rainfall came just in time to help plowing operations along. The present season has opened very auspiciously for Sonoma Valley.

McFADDEN.

The Bigamist Again in the Toils of the Law.

Patrick McFadden, ex-coachman at Buena Vista Park, who was arrested a few weeks ago, charged with bigamy and who was released from custody for lack of evidence to covict, is again in the toils of the law. At the time of his release he promised to return to his Philadelphia wife and their five children. He had no sooner regained his freedom, however, than he again deserted and left them on the cold charity of the world to eke out an existence as best they could. The poor woman driven nearly frantic by the second desertion and being entirely destitute placed her children in an orphan asylum to prevent them from starving. She then sent on to Philadelphia for her marriage certificate and other proofs of her marriage with McFadden, procuring which she commenced a search for the wretch, with the result that on Sunday last he was found, arrested and lodged in jail in San Francisco, and a charge registered against him for bigamy. Proof has been obtainsd of his marriage to his Sonoma wife. Her maiden name was Ella O'Brien and the ceremony which made McFadden a bigamist was performed in St. Rose's church, San Francisco.

Board of Supervisors.

The following resolutions in regard to the new Hall of Records building were passed by the Board of Supervisors last Tuesday:

By Mr. Smith—Believing it to be of the utmost importance that the new hall of records now in course of construction, should be absolutely and unquestionably fireproof, the Board deems it advisable that in all cases where the original contract called for wood in the floors, floor-pieces, cross-beams, gallery railing, except Spanish cedar handrail, either iron, steel or cement should be substituted, and the contractor having filed his written consent to make such changes and alterations for the additional sum of $1,571, I therefore move that the Board do now proceed to take the necessary four-fifths vote in accordance with Section 39 of the County Government act for the purpose of entering into a contract authorizing said changes and alterations.

By Mr. Smith—The Board by the necessary four fifths vote, having concluded to further alter the contract with A. J. Meany for the construction of the new hall of records, and said contractor having consented in writing thereto, I therefore move that the contract now existing be further altered, and that it be further stipulated in said contract that the gallery stairs be changed and reduced from the present width of 3 feet to 2 feet 6 inches; that the gallery be changed from its present width of 9 feet to 6 feet; the gallery floor to be covered with iron instead of wood as called for in plans and specifications; gallery railing to be wholly of iron except Spanish cedar handrail; all ceilings to be made of iron, rolled beams and corrugated iron; floor in copying rooms to be covered with cement the same as in the main room. All to be of first-class material and to be in accordance with the original plans and specifications as far as applicable. The above changes and additions to be done and performed by said contractor, A. J. Meany, at and for the additional sum of $1,671, making the total contract price of said building $23,260.

RUTLEDGE VS. CRAWFORD.

So Far Rutledge Gaines Six Votes.

Much interest is taken in the Rutledge-Crawford contest which was begun in Department 1 of the Superior Court Thursday morning. Judge Rutledge is represented by Judge Temple and A. B. Ware, and Messrs. Farquar and Barham are looking after the count for Judge Crawford. Fourteen precincts out of the 44 contested were counted Thursday and Judge Rutledge gained three votes in Geyserville and the same number in Santa Rosa precinct No. 1.—*Santa Rosa Democrat.*

A Bold Tramp.

A tramp invaded the premises of Jacob Mayers, at Vineyard station, one night this week and broke into the wine cellar. He made considerable noise, however, in effecting an entrance which awoke Mr. Mayers, who was sound sleep in his dwelling which is located a short distance from the cellar. He immediately arose and hastily dressing himself started to investigate the cause of the disturbance. When he reached the door of the winery he was confronted by a tramp, who assaulted him with a club. Mr. Mayers was knocked down and severely bruised about the face. His aged father came to the rescue but was too feeble to render any assistance. His shouts for assistance, however, aroused neighbors living near by who came to the rescue. The tramp, seeing that succor was at hand, took to flight and was soon lost in the darkness. Fortunately Mr. Mayers escaped with a few minor cuts and bruises.

THOSE PUBLIC FUNDS.

Sensible Suggestions by an Enterprising Citizen.

MR. EDITOR:

It is now almost one year since $250 was contributed by a private individual towards improving the Plaza, planting trees, etc., and as yet nothing has been heard of it.

It seems to me that it is the duty of the party who has the money in his possession to apply that money to the object for which it was intended, and not have it locked up with so much other dead capital, which, if properly invested in encouraging home industries, would return its owners a hundred fold and would also place Sonoma on an equal footing with her sister towns of this county.

As regards the $500 now in the treasury of the defunct Sonoma Valley Exhibit Committee, it seems to me that as it would be impossible to spread it over the whole valley with any advantage, it should meet with the approval of every patriotic and generous-minded citizen to apply that money towards erecting a suitable monument in our Plaza to the memory of our late lamented and revered fellow citizen and founder of Sonoma, Gen. M. G. Vallejo. Sonoma owes him at least the memory of a name. His life and career forms an important link in the historic chain of our State and we should regard it as our pride and our boast to have not only the old historic bear flag but also the monument of him who bridged over the chasm when the fate of our great State as a star in that bright galaxy of States trembled in the balance of uncertainty. The history of our young but vigorous State should not be confined to books, it should be crystalized in marble and bronze and written in letters of gold so that "he who runs may read." If the Native Sons should already have such a plan on foot on their own account, then why not apply the $500 towards establishing an electric light plant, or erecting street lamps on our principal thoroughfares, and not have the town as at present enveloped in almost Egyptian darkness.

Yours truly,
ENTERPRISE.

Killed by Carelessly Handling a Gun.

The old story of carelessness in the use of firearms was forcibly illustrated again Wednesday morning by the tragic death of Wm. Finley, son of John Finley, a prosperous dairyman and farmer living near Bodega. It appears young Finley had been making preparations for a hunting trip, and on Wednesday morning completed his arrangements. He was in the act of leaving the family residence when, by an unfortunately careless movement on his part, his gun, a Winchester rifle of the 34-calibre pattern, was discharged, the ball entering his mouth and passing through his head. He was quickly conveyed into the house and common restorations applied, but life had passed away almost with the exit of the deadly loaden messenger from his skull. The deceased was 23 years of age.—*Santa Rosa Democrat.*

New Yorkers Are Afraid of Wires.

A new practical application of electricity is an apparatus to light cigars. The machine is connected by a wire with one of the ordinary light currents, and by touching a button a small but bright electric spark is produced, at which one can ignite the ordinary rod saturated with alcohol. One of these apparatus had just been placed upon the cigar counter of a big down town restaurant. Its use was somewhat unfamiliar to the habitues of the place, and I was told to watch them. As various gentlemen finished their lunch they usually approached the cigar stand to light their weeds.

In several cases they hesitated to apply the rod to the electric spark even after the process was explained to them, although the handle of the rod was evidently composed of hard rubber or some other insulated material. Finally an elderly gentleman approached the machine, and on being told how it worked insisted on holding the point of the rod about two inches away from the light, giving as an explanation his disinclination to "monkey with electric currents." A bystander had finally to light it for him. This goes to show that the public is somewhat afraid of live wires.—New York Star.

The Heedlessness of City Folk.

The heedlessness of Park row pedestrians to matters of passing interest was probably never more forcibly illustrated than about 7:30 o'clock the other evening, when a big plate glass window was broken right before the eyes of at least fifty persons, and only one observed the act. A diminutive Park row hoodlum was swinging on the chain that guards a hatchway in the basement of The Tribune building at that hour. Suddenly one end of the chain broke and struck the plate window of the mineral water store and smashed it. The hoodlum was paralyzed for a second at the damage he had done, but he did not linger to make any inquiries. He recovered quickly, and flew across the square at a Salvator gait. The observer was rushing for a bridge train, and did not have any time to take any action. The proprietor and police will be probably trying to unravel the mystery of how that window was broken until they read this.—New York Sun.

Electric Census Taking.

The English electrical papers in commenting on the great success achieved in Washington by the electrical census tabulating machine, which enabled the authorities to deal with the large returns with such admirable expedition and absence of confusion, express the hope that a similar arrangement will be adopted in the approaching census in England. The staff set aside for the purpose at Washington was able by means of the electrical machines to count the entire population of the United States in ten days of seven working hours each. The population of the civilized world, putting it at 650,000,000, could thus be counted by the same staff in 100 days, and the entire population of the earth, which, including Asiatics and savages, is estimated at 1,300,000,000, could be similarly determined in less than 200 days.

The Hunter's Moon.

The full moon next following the harvest moon is called the hunter's moon. Our satellite is still at a point in the ecliptic near enough to the sign Aries for her to make a small angle with the eastern horizon when rising, though larger than at the time of the harvest moon. As the harvest moon was supposed in the days of old to be a special interposition of Providence to help the husbandmen in gathering in the fruits of the earth, so the hunter's moon was considered as a special boon to the huntsmen in the pursuit of their favorite sport. The October moon rises for three consecutive evenings after the full moon with an average difference of thirty-seven minutes.—Providence Journal.

Great Oaks, Etc.

While gathering sweet violets on the Clarion river's banks last April two little girls found some unusual specimens and planted them at home. Shortly the mother discovered among the collection a small pumpkin vine, which was duly replanted. The vine waxed strong, blooming nicely. A small pumpkin came, and when harvested it weighed forty-two pounds. Its species is veiled in obscurity. Last week the Clarion fair awarded the little girls a premium, and next Thanksgiving, when the Maffitt family has a reunion, the pumpkin will appear revised and made up into pies which the little girls are expected to make.—Chicago Herald.

A rather extraordinary project for power distribution is at present under consideration in Saxony, Germany. It is proposed to establish near the city of Dresden an immense electric central station to furnish high tension currents for lighting and power to 168 small towns and villages in the territory circumscribed by the towns Meissen, Friedberg, Pirna, Schandau, Sebnitz and Radeberg.

Hardly any English people intend to pass the coming winter in India. The annual rush of the last few seasons has been stopped for the time by the outbreak of cholera in Arabia, from which cause Egypt is also likely to suffer severely, as many people who were intending to winter on the Nile are frightened, and consequently have changed their plans.

Feodor von Freimann, a veteran of the Franco-Russian war of 1812, died recently at the age of 115 years in St. Petersburg. He served in the Russian army twenty-five years, and received a cross of St. George for his bravery. At the age of 99 he married a 17-year-old girl, by whom he had two children.

Barbers report that hair dyeing is going out of style. Many "tonsorial parlors" do not keep the dyes. Gray threads in a young man's head, especially if his occupation can be construed to be intellectual, are considered distingue.

"Seeing is Believing."

And the best lamp ever made, like Aladdin's of old, a "wonderful lamp!" A lamp absolutely non-explosive and unbreakable, which gives a clear, soft, brilliant white light of 85 *candle power!* Purer and brighter than gas light, softer than electric light, more cheerful than either! That lamp is

"The Rochester."

And with it there is no smoke, no smell, *no broken chimneys*, no flickering, no sweating, no climbing up of the flame, no "tantrums" nor annoyance of any kind, and it never needs trimming. Its founts (oil reservoirs) being tough rolled seamless brass, with central draft, it is absolutely unbreakable, and as *safe as a tallow candle.*

Only five years old, and *over two million of these lamps in use.* It must be a GOOD lamp to make such a telling success. Indeed it is, for lamps may come and lamps may go, but the "Rochester" shines on forever! We make over 2,000 artistic varieties,—Hanging and Table Lamps, Banquet, Study, Vase and Piano Lamps,—every kind, in Bronze, Porcelain, Brass, Nickel and Black Wrought Iron.

Ask the lamp dealer for it. Look for the trade-mark stamp: "THE ROCHESTER." If he hasn't the *genuine* Rochester and the style you want, or if no lamp-store is near, send to us for free illustrated catalogue (and reduced price-list), and we will box and send you any lamp safely by express, right to your door.

The only garment that will fully protect the man whose business calls him out in stormy weather is the "Fish Brand Slicker." They are light, but strong as iron, handmade throughout, and good for years of service. They are worth ten times their cost, and will save you many a sickness. No other article of clothing will stand the wear and tear. Rubber is fit, will rip, tear, and let in the wet. Therefore get the right sort of coat. The "Fish Brand Slicker" is the only one for your purpose. Beware of worthless imitations, every garment stamped with the "Fish Brand" Trade Mark. Don't accept any inferior coat when you can have the "Fish Brand Slicker" delivered without extra cost. Particulars and illustrated catalogue free.

WHAT IS GOING ON FOR MANY MILES AROUND? ALL UNCOVERED TO THIS EYE, AYE MORE

One of the BEST Telescopes in the world. Our facilities are unequaled, and to introduce our superior goods we will send ONE TO ONE PERSON in each locality, as above. Only those who write to us at once can make sure of the chance. All you have to do in return is to show our goods to those who call—your neighbors and those around you. The beginning of this advertisement shows the small end of the telescope. The following cut gives the appearance of it reduced to

about the fiftieth part of its bulk. It is a grand, double size scope, as large as is easy to carry. We will also show you how you can make from $5 to $10 a day at least, from the start, without experience. Better write at once. We pay all express charges. Address, B. HALLETT & CO., Box 880, PORTLAND, MAINE.
